

Claims

- [c1] A storage device to be worn under a garment for containing personal items comprising:
- a storage compartment defining a top, bottom and opposing sides, the top of the storage compartment including an opening for permitting access to the storage compartment, and
- a storage sleeve attached to the top of the storage compartment for receiving an insertable support member, the storage sleeve extending horizontally across a portion of the top of the storage compartment, whereby upon the insertion of the support member, the support member extends horizontally across the top of the storage compartment to support the storage compartment under the garment.
- [c2] The storage device of claim 1 wherein the storage sleeve is elastic to securely hold the support member within the storage sleeve.
- [c3] The storage device of claim 2 wherein the support member is a cylindrical member.
- [c4] The storage device of claim 3 wherein the cylindrical

member is a lipstick.

- [c5] The storage device of claim 1 wherein the top of the storage compartment includes a zipper for selective closing of the opening in the storage compartment.
- [c6] The storage device of claim 1 further comprising a flap for selective covering of the opening in the storage compartment.
- [c7] The storage device of claim 1 wherein the storage compartment is formed by a single piece of material sewn together at the opposing sides of the storage compartment.
- [c8] The storage device of claim 2 wherein the storage sleeve is sewn to the storage compartment.
- [c9] A system for storing personal items under a garment comprising:
 - a storage compartment defining a pocket and an opening for permitting access to the pocket, and
 - a storage compartment support member attached to the storage compartment, the storage compartment support member including a sleeve for receiving a support, whereby upon receiving the support, the storage compartment support member provides support for the storage compartment under the garment.

- [c10] The system of claim 9 wherein the storage compartment support member is an elastic sleeve.
- [c11] The system of claim 10 wherein the storage compartment support member is positioned above the pocket.
- [c12] The system of claim 9 wherein the storage compartment defines a top, and the storage compartment support member extends horizontally across a portion of the top of the storage compartment.
- [c13] The system of claim 10 wherein the support is a lipstick, the lipstick being insertable into the elastic sleeve.
- [c14] The system of claim 9 wherein the storage compartment includes a zipper for selective closing of the opening in the storage compartment.
- [c15] The system of claim 9 further comprising a flap for selective covering of the opening in the storage compartment.
- [c16] The system of claim 9 wherein the storage compartment defines opposing sides, the storage compartment is formed by a single piece of material sewn together at the opposing sides of the storage compartment.
- [c17] The storage device of claim 9 wherein the storage com-

partment support member is sewn to the storage compartment.
